Cooperations

We successfully cooperate with

Our Team

Executive Team

Head of the Department
Prof. Dr. med. Dr. ès. sci. Thomas Bieber, MDRA
Regina.Nettesheim@ukbonn.de

Senior Physician
Board certified specialist for dermatology and allergy
Dr. med. Dagmar Wilsmann-Theis
Dagmar.Wilsmann-Theis@ukbonn.de

Medical Coordinator
Board certified specialist for dermatology
Dr. med. Hans-Jürgen Kammler
Hans-Juergen.Kammler@ukbonn.de

Lead Study Coordinator
José Garcia, BSc
Jose.Garcia@ukbonn.de

Further study physicians in job rotation

Our physicians are skilled in conducting clinical trials according to regulatory standards and are trained on a regular basis.

Study Assistants:
Yvonne Kliesch
Sigrid Tauber
Kristina Heckel

Our department is part of the

Network of Excellence

and is linked up with the regional psoriasis network

Local ethical review committee

Ethics commission at the Medical Faculty of the University of Bonn

Clinical Study Center
Dept. of Dermatology and Allergy

University Medical Center Bonn

Head:
Prof. Dr. med. Dr. ès.sci. T. Bieber, MDRA
Our know-how in clinical trials

The Department of Dermatology and Allergy as part of the University Medical Center Bonn has a longstanding experience in conducting clinical trials. Together with sponsors from pharmaceutical industry and other scientific institutions we investigate efficacy and safety of topical and systemic medicinal products in a broad range of dermatologic and allergic conditions, mostly as part of international projects.

Our features:

» Clinical Trials (phase Ib-IV) conforming to GCP, according to requirements of German Drug Law (AMG, MPC), ICH, EMA, and FDA
» Investigator Initiated Trials (IITs)
» Epidemiologic Studies

Clinical main areas

In our department, patients profit of the full range of diagnostics and therapy modalities in dermatology and allergy. A timely recruitment in clinical trials is warranted by a densely populated hinterland (more than 1 million inhabitants) and furthermore:

» Frequented outpatient services with ca. 25 000 patient visits per year, including highly specialized clinics for atopic dermatitis, psoriasis, autoimmune diseases, allergy, phlebology, andrology, and dermatologic oncology as well as phototherapy, occupational diseases and dermatologic surgery.
» Inpatient ward and semi-residential care (ca. 50 beds in total)
» Advertising in print and web based media
» Online presence in social media such as Facebook and Twitter
» Data bases of patients from past studies and those interested in future research

Equipment and facilities

In our center, there are separated rooms for

» Physical examination
» Study administration
» Meetings and presentations
» CRA work area
» Temperature controlled storage of IMPs and specimens (deep-frozen and ambient)
» Safeguarded archive

Our team is familiar with standards such as various eCRF, eDiaries/patient reported outcome measures, and IxRS. Data capture via tablet computer is routine thanks to WiFi connectivity.

Additional benefits:

With access to knowledge and high-end equipment of various scientific labs in our department, we offer a range of complementary investigations on demand.
